

Assignment -4

Kubernetes / Docker

PROJECT NAME	Personal Expense Tracker Application
Team ID	PNT2022TMID13651
Student Name	Gopika R
Student Roll Number	621319205009

Question-1:

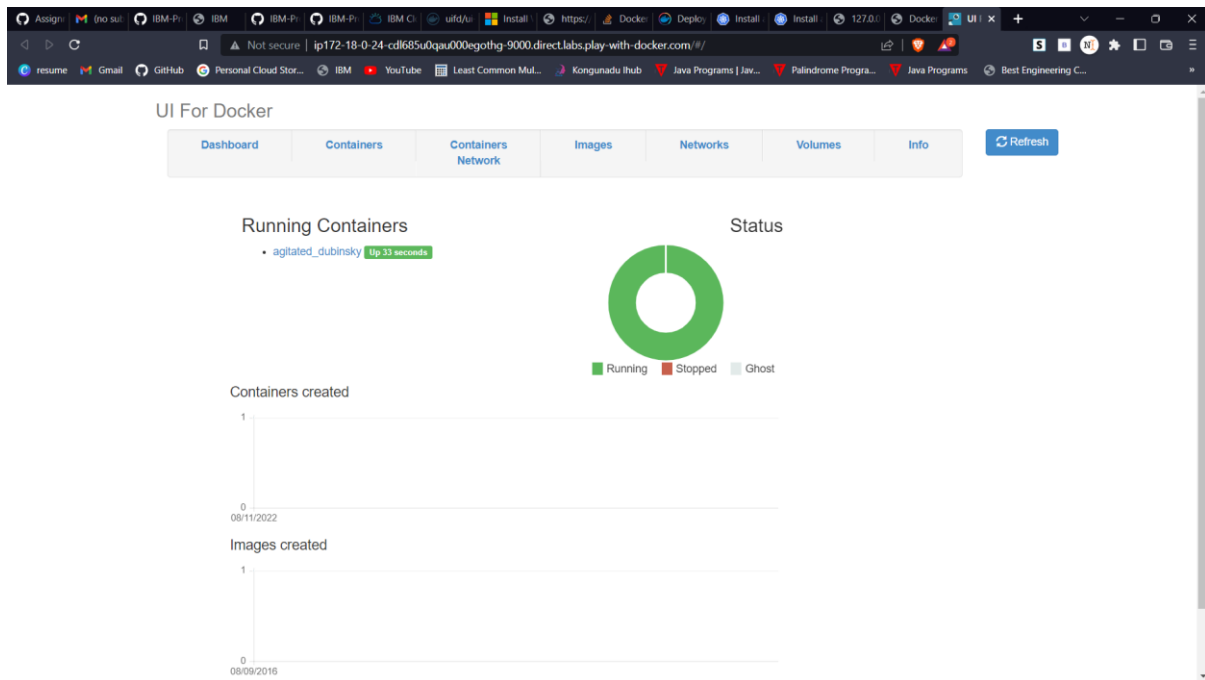

Pull an Image from docker hub and run it in docker playground.

Solution:

The screenshot shows the Docker Playground interface. On the left, there's a sidebar with a clock showing 03:57:52, a 'CLOSE SESSION' button, and an 'Instances' section with a list of instances. The main area displays the details of a container named 'cdl685u0_cdl687v91rrg00ft0om0'. It shows the IP address 192.168.0.18, an open port 9000, and resource usage (Memory: 1.58%, CPU: 0.19%). Below this, there's a terminal window showing the following commands and output:

```
# This is a sandbox environment. Using personal credentials #
# is HIGHLY discouraged. Any consequences of doing so are #
# completely the user's responsibilities. #
# #
# The PMD team. #

```

Question-2:

Create a docker file for the jobportal application and deploy it in Docker desktop application.

Solution:

app.py

```
from flask import *  
app = Flask(__name__)  
@app.route("/")  
def home():  
    return "Hello World"  
if __name__ == "__main__":  
    app.run(debug=True)
```

Dockerfile:

FROM python:3.6

WORKDIR /app

ADD . /app

COPY requirements.txt /app

RUN python3 -m pip install -r requirements.txt

RUN python3 -m pip install ibm_db

EXPOSE 5000

CMD ["python","app.py"]

```

Question-3:

Create a IBM container registry and deploy helloworld app or jobportalapp.

Solution:

```
Command Prompt
C:\Users\ASUS>docker login
Login with your Docker ID to push and pull images from Docker Hub. If you don't have a Docker ID, head over to https://hub.docker.com to create one.
Username: sathiyanth
Password:
Login Succeeded

Logging in with your password grants your terminal complete access to your account.
For better security, log in with a limited-privilege personal access token. Learn more at https://docs.docker.com/go/access-tokens/

C:\Users\ASUS>ibmcloud cr login
Logging 'docker' in to 'icr.io'...
Logged in to 'icr.io'.

OK

C:\Users\ASUS>ibmcloud cr namespace-add helloworldapp
No resource group is targeted. Therefore, the default resource group for the account ('Default') is targeted.

Adding namespace 'helloworldapp' in resource group 'Default' for account SATHIYANANTH PERIYASAMY's Account in registry icr.io...

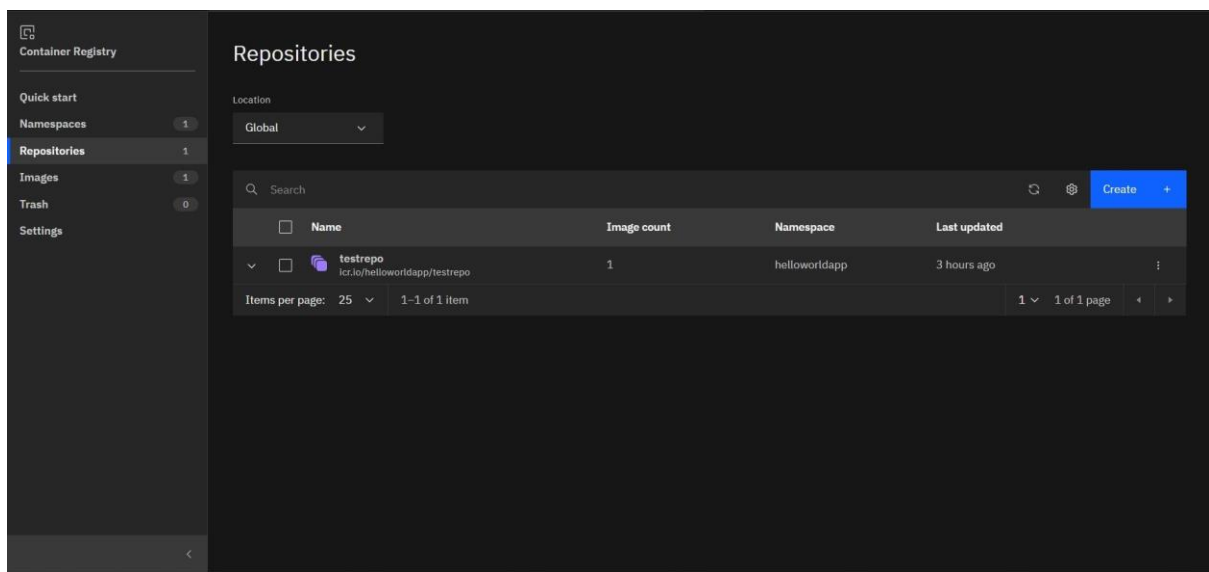

The requested namespace is already owned by your account.

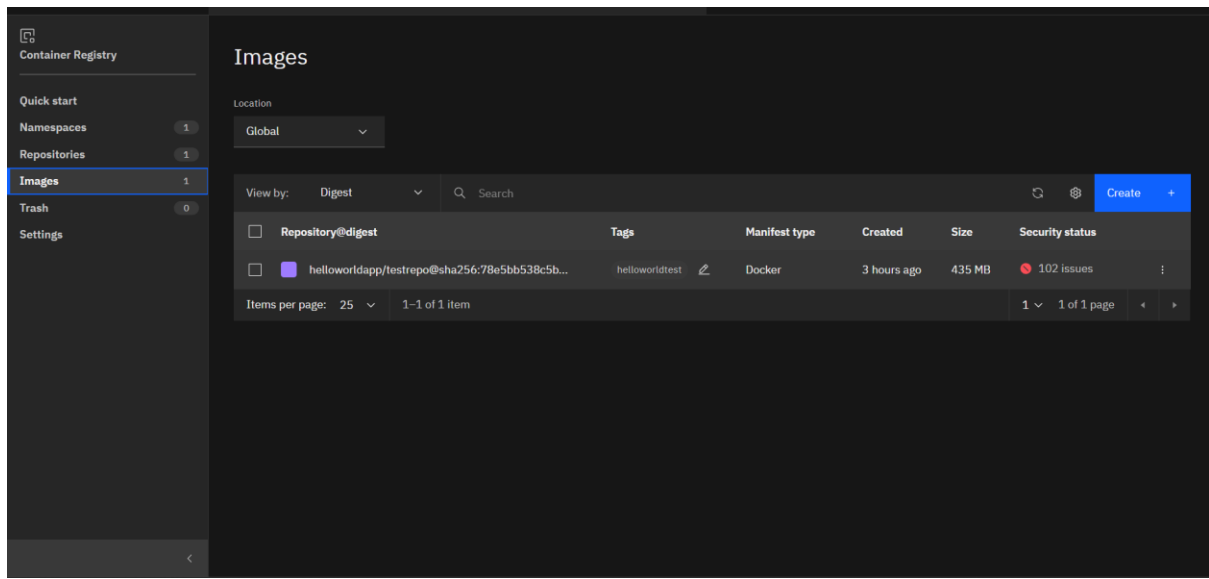

OK

C:\Users\ASUS>docker tag assignment-four icr.io/helloworldapp/testrepo:helloworldtest
